PROFESSIONAL SUMMARY

- Experienced Software QA / SDET around **10 years of experience** in Java, manual and automation testing (web & mobile), API testing, and modern QA practices, contributing to **35% reduction in production defects**.
- Strong expertise in **test automation using Selenium (Java)** with 8+ years of experience, improving regression coverage and reducing manual testing effort by **50%** in Agile environments.
- Hands-on experience in **mobile automation using Appium** and cross-platform testing across Android, iOS, and iPad devices, ensuring high application reliability and compatibility.
- Proficient in building and maintaining **automation frameworks** using **Selenium WebDriver, TestNG, BDD (Cucumber/JBehave), Serenity, Data-Driven and Keyword-Driven approaches**, improving reusability and reducing maintenance effort by **30%**.
- Designed and implemented **BDD-based test cases integrated with Jira**, improving requirement traceability and collaboration between QA and development teams by **35%**.
- Experienced in **CI/CD pipeline implementation** using GitHub, Azure DevOps, Jenkins, and AWS (S3/EC2), improving test execution efficiency and reducing build time by **40%**.
- Strong experience in **API testing and backend validation** using Postman, Rest Assured, and SQL (MSSQL, MongoDB), ensuring data integrity and reducing integration defects by **30%**.
- Solid understanding of **HTTP methods, API workflows, and data validation**, improving response accuracy and system reliability by **25%**.
- Hands-on experience with **AI-assisted development tools** such as GitHub Copilot and Windsurf, leveraging them for test automation, code optimization, log analysis, and documentation, improving productivity by **20–35%**.
- Experience in **functional testing of AI-driven applications**, improving response accuracy and reducing incorrect outputs by **25%**.
- Skilled in **performance testing using JMeter**, conducting load, stress, spike, soak, and scalability testing to identify bottlenecks and improve system performance by **30%**.
- Experience in **security testing using OWASP ZAP**, identifying vulnerabilities such as XSS, SQL injection, and CSRF, and improving application security posture by **15–20%**.
- Strong expertise in **log analysis and debugging**, identifying patterns in API responses and system logs to improve troubleshooting efficiency and system reliability by **20%**.
- Proficient in **test planning, requirement analysis, and test case design** using Jira, Azure DevOps, and Confluence, improving requirement coverage and traceability by **30%**.
- Experience using **AI-powered QA assistance tools** for test case generation, documentation, and reporting, improving QA efficiency and reducing manual effort.
- Performed **end-to-end, regression, smoke, sanity, and system testing** for hybrid applications, ensuring stable releases and improving cross-platform quality by **35%**.

SKILL SET

Core Competencies	Technical Skills
Web Automation & Manual Testing	Programming Languages: Java, SQL
API Testing & Validation	Operating Systems: Windows, macOS
Mobile Automation (Appium)	Cloud Technology: AWS (Lambda, Batch Jobs), Saviynt
Test Planning & Estimation	Databases: MSSQL, MySQL, Oracle, PostgreSQL
Integration & Regression Testing	Web/UI Automation: Selenium WebDriver, TestNG, Maven, Selenium Grid
Agile & Scrum Methodologies	API Testing Tools: Postman, Rest Assured
Defect Tracking & Prevention	Mobile Automation: Appium
Test Documentation & Metrics	CI/CD Tools: Jenkins, GitHub Actions
Quality Assurance (QA)	Monitoring & Logging: New Relic, Kibana
STLC & SDLC	Analytics Tools: Mixpanel
Selenium (Java)	Version Control: GitHub, Azure DevOps (Git), TFS

Automation Framework Development	Frameworks: Data-Driven, Keyword-Driven, BDD (Cucumber), Serenity
Script Maintenance & Optimization	Project Management: Jira, Azure DevOps
Cross-Platform Testing (iOS, Android)	Test Management Tools: TestRail, Zephyr, Quality Center, Microsoft Test Manager
Production & Real-Time Testing	IDEs: Eclipse, IntelliJ IDEA, VS Code
Backend & Data Validation	AI Tools: GitHub Copilot, Windsurf
Collaboration & Mentorship	Other Tools: Confluence, JMeter, OWASP, BrowserStack, Pcloudy, DBeaver, ServiceNow, RabbitMQ
Microsoft Office Suite	MS Office: Word, Excel, PowerPoint, Outlook

EDUCATION

Bachelor of Technology at Jawaharlal Nehru Technological University, India - 2016

CERTIFICATION:

ISTQB Certified Tester – Advanced Level Test Automation Engineer (CTAL-TAE)

ISTQB Foundation Level Certification (CTFL)

AWS Certified Developer – Associate

Azure Administrator Associate

Lean Six Sigma – Certified White Belt

PROFESSIONAL EXPERIENCE:

Sr. QA Test Engineer Manual and Automation | 7 Eleven | Irving, TX

June 2025 - Present

Responsibilities:

- Developed and maintained automated test scripts using **Selenium WebDriver** and **Cucumber**, supporting both UI and integration testing in fast-paced Agile environments.
- Perform **end-to-end testing** of the 7-Eleven store application, ensuring seamless order fulfillment across marketplace integrations and in-house product workflows.
- Test application across **iOS (iPhone, iPad)** and **Android devices**, including customized Android-based store devices used in physical retail environments.
- Conduct **real-time production testing in live store environments**, validating complete order lifecycle and fulfillment flows under real-world conditions.
- Monitor API performance and application health using **New Relic**, identifying bottlenecks and failures in request/response cycles.
- Debug and analyze issues using centralized logging via **Kibana**.
- Validate user behavior and analytics tracking through **Mixpanel**, ensuring accurate event instrumentation.
- Validate backend processes including **Amazon Web Services Lambda functions and batch jobs** for automated updates and order processing.
- Ensure **data consistency across UI, APIs, and database layers** during order and transaction workflows.
- Design and develop **modular automation frameworks** using **Selenium, Appium, TestNG, and Java**.
- Automate web and mobile test cases, significantly improving **regression coverage and reducing manual testing effort**.
- Integrate automated test suites into CI pipelines for **continuous testing and faster feedback cycles**.
- Build and maintain **CI/CD pipelines** using **Jenkins** and **GitHub Actions**, enabling efficient and reliable deployments.
- Perform **API testing** using **Postman**, validating endpoints, request/response structures, and error handling.
- Conduct backend validation using **SQL queries** to ensure data integrity and correctness.
- Leverage AI-assisted tools such as **GitHub Copilot** and **Windsurf** to accelerate automation development and optimize test scripts.
- Improve **code quality, reusability, and execution performance** through AI-driven code suggestions and refactoring.
- Actively participate in **Agile/Scrum ceremonies** including sprint planning, stand-ups, and retrospectives.
- Collaborate with developers and stakeholders to **identify, track, and resolve defects efficiently**.
- Mentor junior QA engineers on **automation frameworks, best practices, and debugging techniques**.
- Contribute to improving QA processes by implementing **standardized test strategies and reusable components**.

Sr Automation Engineer |Singapore Life Insurance| Helius Compu - Tech|HYD India Nov 2024 - April 2025

- Developed test plans and manual test cases using Jira and JBehave.
- Implemented and maintained automation frameworks using Selenium WebDriver, TestNG, and Maven.
- Built mobile automation frameworks using Appium and BrowserStack.
- Configured and managed Azure CI/CD pipelines for scheduled automated test execution.
- Enhanced existing automation scripts to improve test coverage and execution efficiency.
- Installed and validated application builds in the QA environment.
- Participated in Agile SDLC activities including sprint planning, backlog refinement, and sprint reviews.
- Collaborated with development teams in bug triage and daily stand-up meetings to resolve issues.
- Created and tracked testing tasks and defects using JIRA.
- Performed database testing and executed manual test cases to ensure application functionality and data integrity.

Sr. Software Engineer |DBS Tech|Staffice Global Pvt Ltd|Hyderabad, India Sep 2023 - Aug 2024

Responsibilities:

- Led and supervised a team of six QA testers, managing end-to-end testing for hybrid mobile and web applications while ensuring project timelines and quality standards were met.
- Designed and developed scalable automation frameworks using Selenium WebDriver and TestNG with a Behavior-Driven Development (BDD) approach to improve collaboration between QA and development teams.
- Developed automation scripts for validating RESTful APIs using Rest Assured, ensuring backend responses were accurate and consistent with front-end functionality.
- Performed functional, regression, and cross-browser testing of mobile and web applications across multiple real devices and platforms using BrowserStack.
- Created detailed test plans, test cases, and test scenarios based on business requirements and technical documentation to ensure full test coverage.
- Automated end-to-end test scenarios using Selenium WebDriver, TestNG, and IntelliJ IDEA, reducing manual testing efforts and improving testing efficiency.
- Integrated automation frameworks with Maven and Jenkins to configure continuous integration pipelines and enable automated and parallel test executions.
- Conducted web services and API testing using Swagger and Postman to validate system integration, data flow, and response accuracy between ERP systems and databases.
- Performed database testing using SQL queries to verify data integrity, consistency, and accuracy across different application modules.
- Worked in Agile environments, participating in sprint planning, daily stand-ups, and defect tracking using JIRA to ensure timely bug resolution and effective team collaboration.

Sr. Software Test Engineer - QA |Scriptmed| Inovalon | Hyderabad, India Mar 2023 - Aug 2023

Responsibilities:

- Reviewed functional specifications, business requirements, and user stories; actively participated in sprint planning, daily stand-ups, and other Scrum ceremonies
- Participated in sprint planning, daily stand-ups, and reviewed requirements for complete coverage.
- Created and executed end-to-end test cases in Agile development environments.
- Implemented data-driven POM framework; used Apache POI to manage Excel test data.
- Conducted system, UAT, regression, smoke, and ad-hoc testing with detailed reports.
- Used Maven for dependency management and Jenkins for CI and scheduled automation runs.
- Built robust Selenium framework using Java, Eclipse, TestNG, and Apache POI by using AI.
- Developed BDD automation using Cucumber; authored feature files and step definitions.
- Performed parallel test execution using TestNG; optimized test suite efficiency.
- Conducted API testing with Postman and HTTP libraries; validated service functionality.
- Wrote complex MSSQL queries using JDBC for backend data validation and integrity checks.

Sr. Tester- Software | KonnectCo | Freyr | Hyderabad, India February 2021 - February 2023

Responsibilities:

- Led a team of 6 QA testers, managing end-to-end testing for hybrid mobile and web applications.
- Developed detailed Test Plans, Test Scenarios, Test Cases, Test Scripts, and Test Data from functional requirements, both at the application level and for database-level verifications
- Developed test plans, cases, and scripts from functional and database-level requirements.

- Reviewed documentation and backlog items to ensure comprehensive test coverage and accuracy.
- Participated in Agile ceremonies: Scrum, Planning, Reviews, Retrospectives, Grooming, and Release sessions.
- Automated tests using Selenium, Java, TestNG, Maven, IntelliJ, Eclipse, and Log4j.
- Built POM and data-driven frameworks to improve test coverage and code reusability.
- Performed API testing using Postman for REST services and response validation.
- Used Jenkins for CI/CD, TestNG reports, Maven builds, and captured screenshots for debugging.
- Utilized JIRA, Git, and SQL; supported UAT, defect resolution, and offshore collaboration.

Sr. QA Test Engineer | Texas Plumbing Supply | Unilog | Mysore,India

August 2016 - November 2020

Responsibilities:

- Designed complete end-to-end test scenarios for B2B and B2C eCommerce platforms, covering everything from product search and cart flow to checkout and order confirmation. These tests helped ensure the entire customer experience worked smoothly across different user types.
- Used Postman to test APIs for key features like catalog, inventory, pricing, and order placement. Verified that all services responded correctly and quickly, helping to catch integration issues early and keep data flowing between systems reliably.
- Wrote Selenium automation scripts with TestNG to handle regression and smoke testing across multiple browsers. This helped maintain consistent functionality and user experience on Chrome, Firefox, and other commonly used browsers.
- Built test automation frameworks using TestNG, Cucumber (BDD), and Page Object Model (POM), along with Rest Assured for API testing. These frameworks made the tests easier to maintain and scale as new features were added.
- Performed manual testing focused on UI/UX, checking how the application looked and behaved on different browsers and screen sizes. Also explored edge cases to catch bugs that automated tests might miss.
- Worked on validating backend services and APIs, including ERP integrations and microservices running on AWS. Used Jenkins to manage automated test runs as part of the CI/CD process, making sure builds were stable and ready for deployment.
- Worked closely on credit card servicing features like payments, transactions, and account updates to ensure everything functioned smoothly.
- Made sure our testing approach matched the company's goals and met the standards required for financial systems.
- Tested complete credit card workflows from start to finish to catch any issues early and make sure the system stayed reliable.

New Learning and Implementations by understanding and utilizing AI tools :

- Developed a website to the family member: <https://nivasconsulting.com/>.
- Developed a mobile app for storing credentials for easy access apk can find here: <https://shorturl.at/Gmexg>
